Art Unit: 3736

1. The following is an examiner's statement of reasons for allowance: The prior art fails to teach a method of treating a subject using a miniaturized, highly concentrated neutron emitting source of Californium-252 having an outer diameter of about 2 mm or less and about 100 ug or more of Californium-252.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rivard discloses the use of Calironium 252 having an outer diameter of .1-1.5 mm and a concentration of 10ug – 10mg. Rivard was considered, however it appeared that the provisional application 60/149,816 had no support for using a source of Californium 252 with an outer diameter of 2mm or less and a concentration of 100ug or more. Therefore the earliest date for such language is considered to be the filing date of 17 August 2000, which is after applicant's earliest date and therefore not prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
